

**REMARKS**

In the above referenced application claims 1-16 are pending; 1-7 being substituted from the original claims filed as part of the PCT Application and claims 8-16 being added with this concurrently filed preliminary amendment.

The claims of this preliminary amendment have been asserted for the purpose of: conforming them to US practice, eliminating multiple dependant claims, eliminating ambiguities caused by the translation process, more distinctly setting forth and specifically claiming the subject matter that the applicant believes to be his invention, more fully claiming the subject matter to the extent and breadth allowed under the law, and placing the application in better form for allowance. No changes in the claims were made to narrow them in order to avoid prior art cited in the preliminary examination.

In view of the forgoing, the application now believed to be in proper form for allowance and notice to that effect is earnestly solicited.

If the examiner believes that a telephone conference would be of value, he is requested to call the undersigned counsel at the number listed below.

Respectfully Submitted,

Mark R Gordon-Lendvay
